

AP Series

C-Port Air-Port Utility Pads are made from 100% recycled rubber and designed as a non-penetrating economical and light-weight support safe for installation on any type of roofing material or other flat surface. Grooved, recessed tray design prevents movement and dampens vibration while providing a solid support for all electrical and HVAC equipment. The proprietary free-flow leg system allows for easy water passage beneath the equipment inhibiting the growth of harmful moss and mould. The UV resistant Air-Port is the perfect long-lasting alternative to roof-damaging heavy concrete curbing and pressure-treated wood blocks.

Material - 100% recycled rubber, UV resistant

Warranty - 10 years

Recommended Spacing - Refer to local code

May qualify for L.E.E.D. credits

SKU	HEIGHT	WIDTH	LENGT H	WEIGHT	MAX LOAD
